

# CLINICAL TRAINING IN THE LIDCOMBE PROGRAM: A BEHAVIOURAL INTERVENTION FOR STUTTERING IN PRE-SCHOOL AGED CHILDREN

**SEPTEMBER 7-8, 2018 – HOSTED BY:**

State University of New York at Plattsburgh

## ABOUT THE LIDCOMBE PROGRAM

The Lidcombe Program is a behavioral intervention developed by Mark Onslow and his colleagues at the Australian Stuttering Research Centre, to treat stuttering in preschool aged children.

After training, speech-language pathologists will be prepared to teach parents to administer appropriate feedback about fluency and stuttering to their children in every-day speaking environments and to monitor treatment goals and progress.

Studies have shown that this is an efficacious and effective evidence-based treatment for stuttering. The Lidcombe Program has been adjusted for school-age children and special populations.

## MEMBERS OF THE LPTC

### Canada:

Rosalee C. Shenker, Ph.D., CCC-SLP

Christina Lattermann, Ph.D.

Carla DiDomenicantonio, M.HSc.

### United States:

Barry Guitar, Ph.D., CCC-SLP

Melissa Bruce, M.Sc. CCC-SLP

The Lidcombe Program course is offered for 1.2 ASHA CEUs (Professional area, Intermediate level). Disclosures: The presenters receive reimbursement for their presentations. No relevant non-financial relationships to disclose.

## Location of Workshop:

State University of NY  
College at Plattsburgh  
Alumni Conference Room  
Angell College Centre

<https://web.plattsburgh.edu/directions/angell-college-center/>
